DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 and 17-29 are allowed.

The following is an examiner's statement of reason for allowance:

The present invention is directed to a system and method for delivering content from a plurality of sources to a plurality of end servers through a central manager. The independent claim 1 identifies an uniquely distinct feature "re-formatting the content to a form other than that used by the content source; creating a transaction generic to the plurality of end servers, wherein the transaction identifies a set of instructions for storing the re-formatted content". Independent claim 15 identifies an uniquely distinct feature "wherein the first and second transaction allow the end server to execute a first set of instructions associated with the first transactions to store the first content if the first content is desired and execute a second set of instructions associated with the second transaction to store the second content if the second content is desired".

Independent claim 19 identifies an uniquely distinct feature "wherein the software process includes instructions to re-format the content to a form other than that used by the content source and create a transaction generic to the plurality of end servers".

The closest prior art, Sahota et al. (US 2001/0056460) discloses a system and method for acquiring and transforming existing content (e.g., Hyper Text Markup Language HTML content) for display and execution on multiple platforms and architectures, DeBetencourt et al. (U.S. 6,279,001) discloses a system for serving web pages manages a plurality of web servers,
